He had already been in charge ten days over the period of his sentence, and Mr. Johnston obtained a writ of habeas corpus directing Gaoler Luman to bring Hanlan before the court. The writ was returned this morning and Mr. Justice Richardson ordered Hanlan's discharge.

### HARDY CHERRIES.

The following letter, which is worthy of the attention of all interested in fruit growing, is forwarded from the Central Experimental Farm at Ottawa.

To Nurserymen and Fruit Growers:

An important feature in connection with the Horticultural work, during the past five years, at the Central Experimental Farm, Ottawa, has been the testing of hardy forms of the Morello Cherry, recently imported from Eastern Europe. A number of these low growing, partially dwarfed varieties have been in bearing the past two years and give evidence of unusual hardness, vigor and productiveness. This apparent hardness of tree united in many instances with good quality of fruit, renders it advisable that they should be disseminated as early as possible, especially in the interest of the fruit growers in the colder parts of the Dominion.

In order that Nurserymen and Fruit Growers may have an opportunity of testing them without delay, a selection including the most desirable varieties has been made, of which buds for immediate propagation are now available, and will be distributed under instruction of the Hon. The Minister of Agriculture free of charge, on receipt of the application by the undersigned.

Applications should be addressed to the "Horticulturist, Central Experimental Farm, Ottawa." These will be filled in the order in which they are received, as far as it is possible to meet the demand, using our best judgment in selecting suitable varieties for the various sections.

Care should be taken to preserve the names, so that a record of the behaviour of each variety can be secured for the purpose of future comparison. *Mahaleb*, is probably at present the best available stock upon which to work these buds. In the absence of this they may be set upon stocks of *Mazzard*, *Bird Cherry*, (*Prunus Pennsylvanica*) or the *Common Red Cherry*, with a fair degree of success.

JOHN CRAIG, Horticulturist.
